-->Yucca Mountain is not an acceptable repository for nuclear waste. The geology is not right for this idea and the use of Yucca Mountain will have extremely perilous shipments coming in from all over the country. The rail idea is outrageous ... it would make a ridiculously easy target for terrorists. Have you been blissfully unaware of the train wrecks that happen periodically with no assistance from terrorists? Certainly trucks would be equally inviting to terrorists and very easy to disrupt ... i live close to I-10 and am well aware of the frequency of 18 wheeler wrecks nearly every week just within the Houston City limits.. We need to QUIT creating this waste and pursue other solutions for the generation of energy ... beginning with CONSERVATION. Thank you; Eleanor Culberson
